Welcome to Plast Pack 2025

Unleash the innovation at India's one of the most premier expo Plast Pack 2025. It is the ultimate hub for plastic, packaging and printing solutions providing a common platform to exhibitors and buyers who want to see, explore and experience solutions in person.

Organised by Indian Plastpack Forum (IPPF), the show is a one stop destination for visitors to experience cutting-edge technologies and innovation in the industry. It is all set to embark on a legacy of achievement and growth.

Meet the organisers

The Indian Plast Pack Forum (IPPF), established in 1996, is a leading Plastics and Packaging association in India. It is one of the oldest representative bodies in central India that represents a diverse range of sectors including plastic processors, machine manufacturers, equipment manufacturers, traders, distributors and agents.

Focused on innovation and development, IPPF is engaged in various activities such as trade promotions, seminars, webinars, symposiums, factory visits, organising lectures by experts and arranging study tours.

Since organising Plastpack- 97, IPPF has successfully arranged the number of national-level exhibitions. Its main objective is to bring together market experts, promote professionalism with dynamism and build a strong network to deliver real business benefits to the participants.

Opportunities at Plast Pack 2025

400+ Exhibitors

A diverse range of exhibitors from various sectors within the plastics industry.

**8,000 Sq. Meters
of Exhibition Area**

A spacious venue to explore numerous exhibits and live demonstrations.

500+ cars

Parking facility for 500+ Cars.

A unique opportunity to network with industry leaders and decision-makers.

**100,000+ Business
Visitors**

Engage with regional industry experts and discover new market opportunities.

**Participation from
8+ States**

Major Exhibiting Categories

- ◆ Machinery & Automation Industry
- ◆ Plastic Industry Mould and Dyes Maker
- ◆ Injection Moulding Machinery Manufacturers
- ◆ Extruders & Extrusion Lines
- ◆ Auxiliary & Testing Equipment Manufacturers
- ◆ Variable Data Printing Machines
- ◆ Plastic Packaging & Finished Good Industries
- ◆ Plastic Recycling & Green Energy Solutions
- ◆ Blow Moulding Machinery Manufacturers
- ◆ Reprocessing & Recycling Machines
- ◆ Printing & Finishing Machinery Manufacturers

The growing plastic, packaging and printing industry

The Indian economy, one of the world's largest and fastest growing, has witnessed robust growth rates in the last few years. At the forefront of this progress is the plastic industry, which has emerged as a vital segment of the country's economy.

The Indian plastic industry ranks third in the world for both plastic consumption and single use plastic production. The current size of India's plastic industry, which employs more than 4 million people, is estimated to be Rs. 3 lakh crore. It comprises more than 30,000 processing units manufacturing different products like housewares, cordage, medical items, pipes, films, raw materials and packaging items.

Packaging is one of the major constituents of the plastic industry which drives industrial growth and innovation. It is the fifth largest sector in the Indian economy that is constantly evolving while leveraging technological innovations and sustainable practices. It is expected to reach USD 204.81 billion by year 2025.

The commercial printing sector is another major player that ensures inevitable growth of the Indian market. It is driven primarily by the development of innovative printing technologies by the manufacturers. An industry with the market size of USD 34.5 billion has the potential to reach 45.3 billion by the year 2032. The focus shift towards engineered products with a reduced carbon footprint, high energy efficiency, better resistance to chemicals and transition to digital technology have provided significant growth to the market.

Madhya Pradesh: The heartland of India

Madhya Pradesh is a bustling hub for plastic, packaging and printing businesses in India. Its strategic location offers numerous connectivity options through extensive expressways, railways and five airports. The state houses some of the cleanest cities in India, and boasts of six inland container depots. The competitive power charges and supportive government policies are other benefits crucial for establishing and expanding businesses.
